- Deep Odor Removal - Smoke, Pets, Mildew, Spoilage
- Mold Remediation - Eliminate from air, breathe easier, stop mold growth
- Heavy Disinfection - Destroy bacteria, germs, and viruses

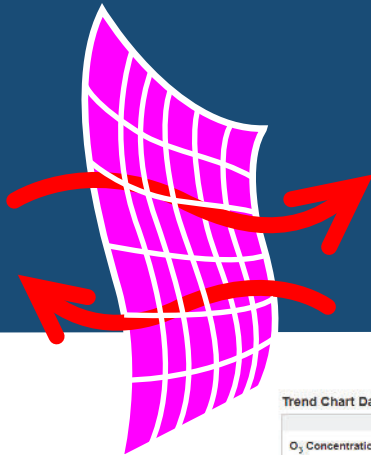

WWW.PURFRESHCLEAN.COM

HOW DOES IT WORK?

Contaminants are destroyed when **O₃ oxidizes and breaks down** molecular structures. Germs and odors are eliminated and not simply covered up

ADVANTAGES OF USING OZONE OVER OTHER DISINFECTANTS?

Since **O3** is a **gas**, it easily permeates all areas of a room and hard-to-reach areas, including ventilation. It also has the additional benefit of being able to disinfect aerosols suspended in the air. O3 Disinfects room surfaces and the air at the same time.

DIGITAL CLEANING RECORDS

Heavy airflow with O3 cleans in corners, behind furniture, and hard to reach areas:

- No liquid and will not damage valuable items like other cleaners
- Cleans and removes odors and germs from fabric and rugs extremely well
- Leaves zero chemical residue, all O3 changes back to O2 after cleaning is completed
- Offers digital science based cleaning records and reports from included sensors
